

**53 Confluence of the Salmon and Snake Rivers**

OREGON

IDAHO

Mile 188

Mile 189

Mile 0

**53.2 Salmon River Falls Rapids Class II** - This long wave train, with strong eddy turbulence, is often congested. Take precautions to avoid power boat and float boat mishaps.

**52.9 Pullman Mine -** Copper mine was active in the 1920s. Mining equipment still visible at the mine entrance was probably brought up the Snake River by steamship.

**52 Eye of the Needle Rapids Class III** - This short, very turbulent drop is harder than it looks.

CRAIG MTN

Wapshilla Ridge

**51.5 Checkerboard Rapids Class II+** - A long wave train with some rocks at the bottom.

Mile 1

RIVER

Mile 2

**50.2 Sluicelox Rapids Class II+** - A long, steep rapid with big waves in lower water.

Mile 3

Pool Gulch
